The reply filed on 2-8-02 is not fully responsive to the prior Office action because of the following omission(s) or matter(s): applicant canceled all previous claims and presented new claims but did not elect a group for prosecution on the merits. The new claims appear to fall into two patentably distinct groups as defined below.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 23, 25, 27-29, drawn to methods of activating a prodrug by administering a carboxylesterase.

Group II, claims 24-27 and 30-31, drawn to methods of activating a prodrug by administering a nucleic acid encoding a carboxylesterase.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The methods of Group I and II do not share a corresponding special technical

Art Unit: 1652

feature because the prior art clearly teaches methods of using a carboxylesterase to metabolize a chemotherapeutic drug to the active drug (see for example Danks et al. or Senter et al., References AB and AG of applicants' PTO-1449). Therefore, the only shared technical feature of these claims does not constitute a special technical feature as defined in PCT Rule 13.2 as it is not a feature which defines a contribution the claimed invention makes over the prior art.

Applicant is advised that the reply to this requirement to be complete **must** include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is hereby advised that any further cancellation of all previous claims and introduction of new claims **without** an election of subject matter of one of the groups as has been defined in the two restriction requirements will be held deliberately non-responsive.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
